FIT FRAME PROTECTION

ONE
FRAME
TOTAL PROTECTION

THE FIT FRAME FROM TIMELY PROTECTS YOU AGAINST ALL ATTACKERS

SECURITY

- » Fit Frame's 18 gauge steel exceeds the performance of traditional 16 gauge steel frames for lateral impact, forced entry and total door weight
- » Far exceeds the security performance of wood or traditional hollow metal frames
- » Fit Frames ship with a unique anchorage system – 36 fasteners mount to the structure which provides exceptional stability

FIRE

- » Fit Frame is fire rated for 90 minutes with a factory installed fire rated Q-Lon seal
- » Meets fire rating requirements for corridor and stairwell doors

SMOKE

- » Fit Frame qualifies for 'S' rating to seal out smoke
- » Protection from deadly hot gasses in case of fire

SOUND

- » Keeps out irritating noise from public spaces
- » Consult factory for available Fit Frame STC rating

LIGHT

- » Fit Frame's factory installed weatherstripping guarantees a positive light seal which provides a peaceful lighting environment for your living space

AIR & WATER

- » Fit frame's factory installed weatherstripping blocks out air and water
- » Ideal for exterior openings requiring a barrier to the elements

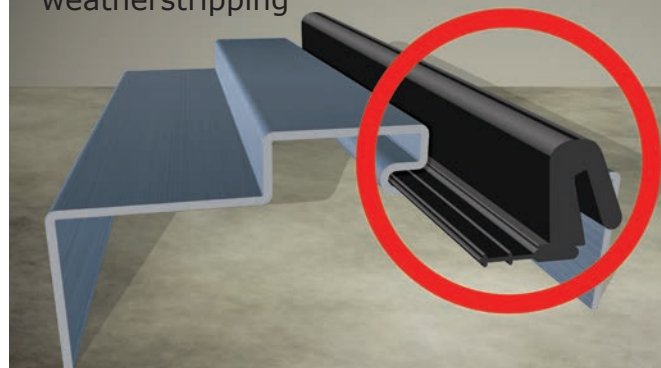

LOWER COST – SAVE UP TO 40% WHEN COMPARED TO TRADITIONAL STEEL FRAMES

- » The Timely Fit Frame comes prefinished with factory installed mitered weatherstripping.

With a Timely Fit Frame installation you get an appreciable time savings benefit, plus up to a 40% total cost savings when compared to a typical field frame installation using adhesive seals.

FIT FRAME comes with factory installed weatherstripping

FIT FRAME PROTECTION

PROTECTION IS PART OF THE TIMELY PRE-FINISHED OPENING SYSTEM WHICH PROVIDES

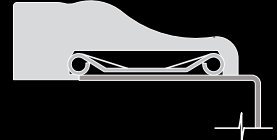

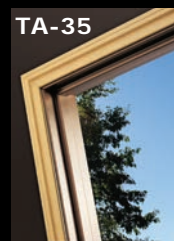

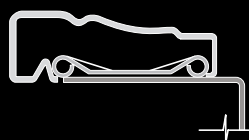

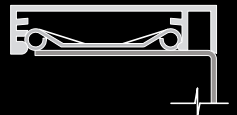

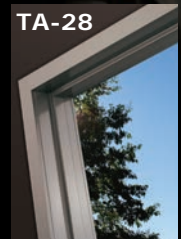

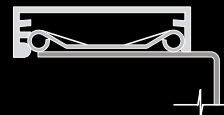

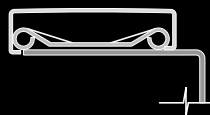

DESIGN OPTIONS

- » Factory prefinished with superior polyester paint system – available in 6 standard colors and unlimited custom colors
- » 6 Optional casings provide elegant design choices while maintaining the exceptional performance and stability of the Fit Frame structure

LEED AND SUSTAINABILITY

- » MR2.1 and MR2.2 – 28.9% of content is recycled steel
- » Factory prefinished to eliminate jobsite VOC emissions
- » All packaging is recyclable
- » Frames can be easily relocated and reused as building needs change
- » Frames are 100% recyclable when the building has ended its life cycle

TIMELY HAS BEEN MANUFACTURING STEEL DOOR FRAMES FOR 40 YEARS. DON'T FORGET OUR OTHER LINES.

STANDARD FRAME

Timely Standard steel door frames have been made in the USA for over 40 years. They are faster, easier to install, and our prefinished frames eliminate the added expense and inconvenience involved in jobsite painting.

TIMELY SIDELIGHTS AND BORROWED LIGHTS

The beauty and economy of the Timely frame sidelight and borrowed light system are available to meet most glazed opening requirements, and because they're prefinished, they can be applied over finished walls.

ADJUSTABLE FRAME

Timely's slide guide system allows its Adjustable Frame to accommodate any wall thickness from 3-3/4" to 9-1/8" with only 3 closure strips. It can be prehung or used as a standard drywall frame.

NOW AVAILABLE FROM TIMELY... CUSTOM HARDWARE PREPARATIONS

From electric power transfers and rescue hardware to concealed vertical rod exit device strikes and even heavy-duty, 4-1/2" hinge prep, Timely can custom prep our door frames to meet your specifications.
