

WIRELESS INTELLIGENCE THAT STANDS ALONE.

INTRODUCING WI-Q™ TECHNOLOGY FROM STANLEY SECURITY SOLUTIONS.

If you've been waiting for uncompromising wireless intelligence to show up at your door, Wi-Q™ Technology has just arrived. Developed and patented by STANLEY Security, Wi-Q™ Technology is quickly becoming recognized as the most powerful and comprehensive wireless systems in the industry. In fact, with so many advanced features STANLEY Wi-Q™ Technology provides a level of wireless intelligence and functionality that truly stands alone.

Portal gateway provides intelligent wireless communication

WE JUST UNLOCKED THE SECRET OF WIRELESS SECURITY.

Wi-Q™ Technology is a smart and efficient system that will change the way you look at wireless. The system's 128 bit security encryption and ultra-smart power consumption provide unsurpassed wireless benefits. And with multiple redundancy provided at the reader, gateway and host, Wi-Q™ Technology guarantees that door access will always be controlled even during power failures.

Wide channel selection with spread spectrum technology
COLLISION AVOIDANCE PUTS DECISION POWER AT THE DOOR
Collision avoidance methods ensure trouble-free wireless operation

128 BIT AES SECURITY ENCRYPTION FOR SECURE TRANSMISSIONS
Upgrade path available for current offline locks
Easy integration with existing Stanley Access Control Software

Choose from multiple reader formats, including dual validation
STAND-ALONE LOCKS REQUIRE NO WIRING

Wireless intelligent readers enable decision making at the door

THE SMARTEST SYSTEM IN THE WIRELESS WORLD.

STANLEY Wi-Q™
Access Control Software
Allows management of
access control application

Portal Gateway
Enables bidirectional
communication between wireless
readers and host computer

STANLEY Wi-Q™ Technology is a simple, yet revolutionary approach to wireless security. The system combines patented wireless access management software with wireless access controllers, integrated gateways and multiple reader formats that seamlessly work together in providing unsurpassed benefits to your facility. At the same time, the system is easy to install and easy to expand within your environment.

Wireless Access Controller

Provides wireless capability for hard to wire applications, retrofit capability for existing hard wired applications, and an easy path to control ADA auto-operated doors with a reader

Wireless Access Door Reader

Available for all magnetic stripe, proximity and dual validation formats

PUTTING INTELLIGENCE AT THE DOOR...AND POWER IN YOUR HANDS.

STANLEY Wi-Q™ Technology offers an effective wireless solution that gives you decision making power at the point of access. The system is faster, more reliable and consumes much less energy than any other wireless system on the market. And with no need for wiring, STANLEY Wi-Q™ Technology can be installed or retrofitted at existing facilities with virtually no operational disruption.

WIRELESS ACCESS CONTROLLER

Allows wireless card access for parking gates, turnstiles and hard to wire applications

Monitors door latch, door status and Request to Exit status

Interface with all Weigand readers and provides an easy path to control ADA auto-operated doors with a reader

Auxiliary relays control electrified exit devices, locks, door contact switches, glass-break switches and other alarms

Retrofit capability for existing Access Control Systems allows field conversion to a STANLEY wireless compatible system

STANLEY software applications support online, offline and Stanley Wi-Q™ Technology

BEST WIRELESS LOCK

Heavy-duty locks available in mortise, cylindrical and exit style trim

Card access technology works during network and power failures

Switch and sensor technologies of BEST mortise locks provide accurate data to determine leave vs. break in, closed vs. latched and key vs. card scenarios

Triple redundant storage of transactional data at reader, gateway and host

Supports proximity, magnetic stripe and dual validation technologies

Wireless communication secured through redundant path 128 bit AES encryption

Wi-Q™ Technology is the latest innovation from STANLEY Security - the world's most comprehensive provider of security products and technologies. As an evolving platform, look for Stanley's Wi-Q™ Technology to be utilized in an ever increasing variety of our industry leading products.

STANLEY Security offers one of the world's most comprehensive line of services, industry leading products and cutting-edge technologies. With a powerful portfolio of top security brands and services specialized to meet customer needs, we deliver complete, customized solutions to any size facility. Our integrated team of 13,000 global employees, over 225 sales and service offices and more than 1,000 mobile technicians, provide an unparalleled level of system support and customer service. Our experts stand ready to respond to your needs 24 hours a day, 7 days a week.

STANLEY
Security

Stanley Security Solutions, a business division of Stanley Black & Decker, is a provider of integrated access control and security solutions for institutional, commercial and industrial businesses and organizations. Stanley Security Solutions delivers a comprehensive suite of security products, software and integrated systems with a strong emphasis on service. Stanley Security Solutions is committed to extending its position as a leading comprehensive resource for a broad and extensive array of solutions that span the entire security spectrum.
